CAREER OBJECTIVES

To obtain a challenging position as a Software Engineer where I can apply my knowledge of programming, data analysis, and analytics to develop efficient solutions, contribute to innovative projects, and continuously enhance my technical and professional skills in a growth oriented environment.

PROJECTS

Smart Ration Distribution System

- **Developed** a full-stack **Smart Ration Distribution System** as a digital upgrade to the traditional ration card system.
  Building a secure backend using **Python** (**Flask**) to manage user authentication, session handling, and system workflows.
  Designing a responsive web interface using **HTML5, CSS3, and JavaScript (ES6+)** for seamless user interaction.
  Implementing mobile-based beneficiary verification to ensure secure and authorized access.
- **Integrating secure authentication** mechanisms, including session management and password hashing using **Flask-Bcrypt.**
  Using SQLite for lightweight and efficient data storage of user details, ration records, and transaction history.

AI-Powered Mock Interview Coach

- **Developing an AI platform** using **Tesseract OCR** and **PyPDF2** to extract resume data and identify skill gaps through **NLP analysis,** built with **Streamlit** and **Custom CSS3,** using **Python** (Multithreading), **Pandas AI** & **NLP** and **Scikit-learn** (TF-IDF), including Speech-to-Text (STT) and Text-to-Speech (TTS) **OCR**
- **Implementing** an **adaptive interview simulation** engine with **Solo and multi-persona Panel modes,** integrating **Real-Time Speech AI** using **SpeechRecognition** and **Pyttsx3,** a **live camera visual feedback system**, and feeds to **monitor engagement** a **performance telemetry dashboard** using **Pandas** and **NLP** to track **vocal fillers** and confidence, with an **AI scoring module** generating reports using **TF-IDF similarity** and **STAR methodology**

SKILLS

- **Programming Languages:** C, C++, Python, Java, Node js, R
- **WebTechnologies**:HTML5,CSS3, JavaScript,RESTAPIs,Client–Server Architecture, Full Stack Concepts (MERN, MEAN)
- **AI / Machine Learning:** Machine Learning Fundamentals (Supervised & Unsupervised Learning, Classification, Regression), Natural Language Processing (NLP), Scikit-learn, OpenCV, Image Processing, Neural Networks, Generative AI, Large Language Models (LLMs), Prompt Engineering, Agentic AI.
- **Networking & Linux**: IP Addressing & Subnetting, TCP/IP & OSI Model, Routing & Switching, VLAN, DNS & DHCP, NAT, Firewall Basics, Linux Basic Commands
- **Database**: MySQL, SQL Server, MongoDB,Oracle
- **Tools:** PyCharm, VS Code, MS Office 365
- **Version Control:** Git, GitHub
- **Operating System:** Windows, Linux(Ubuntu).
- **Other Skills:** Teamwork, Problem Solving ,Time Management,

EDUCATION

Diploma in Information Technology & Data Science
Nettur Technical Training Foundation, E-City, Bangalore
CGPA: **8.6** / 10
Year of completion:2026

Bachelor of Arts(Degree)
Magadh University
College Bodh Gaya (Bihar)
Year of completion:2022
Percentage: **66.1%**

ACHIEVEMENTS

- Represented my school in a district-level drawing competition and secured First Prize.
- Won multiple awards in cultural and sports activities at school and college levels.

CERTIFICATIONS

- **Cisco Networking Essentials Course** – Cisco Networking Academy, Online, 2024
- **Cloud Computing & Python Development** – Infosys Springboard, Online, 2024
- **IoT & Automation Workshop** – Wadhwani Foundation, Online, 2025
- **Introduction to Ai** (microsoft) , Online, 2025
